Wind Breaker

Glass windbreakers are a fantastic way of providing shelter on your terrace or veranda, without restricting or confining the space.

TGP can advise on a range of glass windbreak solutions. As well as traditional fixed windbreaks we can also provide adjustable glass windbreak systems for additional flexibility, allowing you to change the layout of your space and adapt to the weather conditions.

It is a revolutionary glazing system product! Restaurant gardens, terraces, open areas of cafes, swimming pools and balconies or even in commercial or government buildings...

Just lift it up to remove wind affect!
The panel is 110 cm high when closed, with a basic touch it rises up to 190 cm height and also descends down with a simple touch.

Why TGP windbreak systems?

TGP Glass windbreak system is a design for the enclosure of external spaces. It is operated manually: By lowering the upper glass, the horizontal counterweight is lifted, by upping the upper glass the horizontal counterweight is lowered, this makes the system more durable and easier to use. By adjusting the level of glass you can widen your view, rest and relax without the disturbing wind.

Easy to use, easy to move

- Balancing by weight
- Aesthetic appearance
- Various glazing options
